NEW FORMART « SWS REGIONAL CUP »

In order to maintain this project of "regionalising" zones and offering events accessible to the SWS community, we have been working on a new model for setting up these events.

Creation of a new label « SWS Regional Cup »

- The event is not a Final.
- New areas defined to select the organizing tracks.
- There may be multiple events in each area (especially in those where there is high activity and participation in SWS races).
- Maintain the current qualification model by integrating the SWS Regional Cup.

Objectives of the SWS Regional Cup events

- Creation of a new, specific SWS label.
- Rely on the global network, know-how and experience of SWS partners (tracks and/or private organizers).
- The organization of the events is ensured by the chosen SWS partners (tracks and/or private organizers).
- Supervision of events labelled SWS Regional Cup by the SWS team – 3MK Events.
- Allocation of additional places for the current year's SWS International Finals.
